

The American Research University Serving Society

Tokyo
December 2016

Mary L. Walshok, Ph.D.
University of California San Diego

The historical roots of the American Public Research University are deeply embedded in the notion of a university as an institution which;

a) enhances regional economies; b) develops human capital through education and training; c) contributes to civic culture and the sustainability of a democratic society.

Historically through devices such as cooperative extension, schools of continuing education, offices of public service and outreach, this mission has been fulfilled.

The imperatives of the 21st century ever-changing global political economy have catalyzed American Universities to fulfill this mission in new ways.

21st Century Imperatives

- 1) The central research questions and human development issues of our time require interdisciplinary and cross-functional approaches to research, teaching and learning.
- 2) Without broad, public understanding of change and the new realities of change, it is impossible to implement economic development or human development initiatives at the local level.

- 3) This means that engagement strategies need to be holistic, addressing simultaneously civic culture, human development and economic development. It requires connecting meaningful conversations among multiple stakeholders in the knowledge enterprise, both on campus and in the community.

4) Successful Implementation Depends on:

- A commitment from senior leadership and processes which build institution-wide buy-in, i.e. strategic planning
- Business models which enable engagement activities; organizing and financing 21st century engagement
- Leveraging existing assets and enhancing investments to produce results
- Recognizing the need for a new kind of knowledge worker: the boundary spanner, the linker, facilitator, integrator role
- Convening diverse stakeholders in conversations and the co-creation of initiatives with shared goals and shared metrics
- Assuring a wide circle of co-investors

The Concept of Engagement

Engagement is a very different phenomenon than outreach.

It assumes;

- a) that important knowledge exists not only in the university but in the society, organizations and everyday practice.
- b) it recognizes that university anchored basic research and knowledge development are enhanced and enriched by multiple forms of knowledge.
- c) it organizes activities in a manner which harvests and integrates rather than simply disseminates knowledge.

A Case Study of an Engaged University: UC San Diego

- Contributing to business development and economic growth: UCSD CONNECT and the Von Liebig Center
- Addressing the talent development needs of existing and emerging industry clusters:
 - Certificate and executive programs;
 - Applied Masters Degrees and Ph.D. partnerships with industry
- Informing and enriching regional Civic Culture; Center for US Mexico Studies, Endowed Lecture Series, UCTV
- Assuring access to education and enrichment opportunities; Academic Connections, Reality Changers, community clinics

UC San Diego Extension Annual Report 2015

Educational offerings that inspire at every stage of life

92,604 Enrollments in public programs, concurrent registrations and in-service programs enabled by Extension, consisting of 86,421 students

1,210 Fully online professional credit courses with 18,824 enrollments and 11,062 students

392 High school students in Extension Academic Connections programs

1,978 Students in Extension SAT and ACT prep courses

2,607 High school and middle school students in Extension managed STEAM-related courses

81 UC San Diego undergraduate students in LAUNCH career preparation program

1,993 UC San Diego alumni enrollments in Extension courses

3,546 Enrollees in life sciences and technology courses

1,027 Members of Other Lifelong Learning Institute

UCTV offering cutting-edge content with a global reach

102.5 Million video views of the Extension managed UCTV website

246,853 Subscribers to UCTV's YouTube Channels

21,529 Likes on Facebook

4,853 Twitter followers

4 million Homes reached by UCTV broadcasts of faculty lectures and campus events

UC San Diego Technology Transfer Annual Report FY2014

14 | UC SAN DIEGO TECHNOLOGY TRANSFER OFFICE ANNUAL REPORT

Key Results

INNOVATIONS REPORTED

Innovations developed at UC San Diego include inventions, tangible research materials (TRM), and copyright/trademarks. TRMs represent a wide range of materials that include cell lines, plasmids, and mice. In FY2014, 409 innovations were reported to the TTO.

LICENSES

In FY 2014, total licenses executed numbered 68 (49 invention licenses and 19 copyright/trademark licenses). Compared to FY2013, the number of invention licenses remained stable, but copyright and trademarks dropped from 27 licenses to 19. Starting in FY2013, the execution date of the license is used to determine fiscal year metrics. Previously the effective date of the license was used.

AGREEMENTS

In FY 2014, a total of 727 new agreements was executed, an increase of nearly 50 when compared to FY2013. This fiscal period saw higher numbers recorded for material transfer and confidentiality agreements. The largest category was material transfers at 312, followed by 218 confidentiality, 96 administrative, 68 licenses, and 33 letter agreements.

START-UPS

In FY2014, 16 new start-ups were formed with licensed university technologies, compared to 15 new start-ups formed in FY2013. Fifteen of the start-ups are based in southern California, with the majority based in the local San Diego region. Of the sixteen new start-ups, eleven are focused on developing new products or services in the healthcare area such as therapeutics and medical devices.

UC San Diego Rady School of Management Impact Report 2015

Attracting the best and brightest students to the Rady School of Management

The Rady School of Management extends a big **THANK YOU** to everyone who gave to fellowships in 2015. Your impact will be felt for years to come.

Your support of Rady School fellowships not only gives students the opportunity to pursue their MBA education, it's a great vote of confidence in their ability to succeed. Fellowship support relieves the financial burden of attaining a Rady School education, freeing students to pursue internships and independent study projects, further enhancing their learning and careers. The impact of fellowship support extends beyond campus, fueling the development of business leaders who will contribute to a strong and sustainable economy in San Diego and beyond.

Jacobs School of Engineering

2015
SNAPSHOT

RELEVANCE + EXCELLENCE

Through research, education and entrepreneurship, we solve global challenges while creating career opportunities, generating IP, launching companies and supporting industry clusters.

INTERDISCIPLINARY INITIATIVES

Engineering and Clinical Medicine
Materials and Energy
Global Entrepreneurism
Oceans and Environment
Maker Space and Design
Global Production and Innovation
Contextual Robotics

UC San Diego by the numbers

\$1.0 Billion 5th in USA	Research Enterprise For Federal R&D Expenditures
1,611 26,590 7,145	UC San Diego Faculty Undergraduates (Fall 2015) Graduate Students (Fall 2015)

224 PROFESSORS

18 New faculty hired in 2015
17-23 New faculty to be hired in 2016

8,921 ENGINEERING STUDENTS

6,677 Undergraduate students
1,198 Bachelors degrees conferred
1,177 Masters students
438 Masters degrees conferred
1,067 PhD students
163 PhD degrees conferred

\$162M IN RESEARCH FUNDING

\$117M Government-sponsored research
\$45M Industry-sponsored research +
income from gifts/endowments

CONTEXTUAL ROBOTICS INSTITUTE

We develop safe, useful robotics systems that will act based on real-time context for disaster response, medicine, transportation and more. Launched by the Jacobs School of Engineering and the Division of Social Sciences at UC San Diego.

INNOVATION HAPPENS HERE

UC San Diego
Jacobs School of Engineering

ACADEMIC DEPARTMENTS

BIOENGINEERING

25 Faculty
621 Undergraduates
252 Graduate students

- bioinformatics / genomics
- biomechanics / biomaterials
- biophotonics / biosensors
- cardiac mechanics, cardiology, cardiovascular engineering
- cartilage tissue engineering
- cell / tissue mechanics
- genomic engineering
- metabolic bioengineering
- microcirculation / microhemodynamics
- molecular / cellular bioengineering
- nanotechnology
- neuroengineering
- stem cells / regenerative medicine
- systems biology

COMPUTER SCIENCE & ENGINEERING

54 Faculty
2,279 Undergraduates
586 Graduate students

- bioinformatics
- computer architecture
- computer science pedagogy
- databases
- embedded systems & design
- graphics and vision
- machine learning
- programming languages and compilers
- security / cryptography
- software engineering
- systems and networking
- theoretical computer science

ELECTRICAL & COMPUTER ENGINEERING

51 Faculty
1,269 Undergraduates
587 Graduate students

- bioinformatics / bionanotech
- brain imaging / mapping
- cyber-physical sys. security
- electromagnetics
- electronic circuits and systems
- embedded systems
- info tech / communications
- intelligent systems / robotics
- machine learning
- magnetic and optical storage
- medical devices and robotics
- nanoelectronics
- network infrastructure
- neural interfaces
- photonics / nanophotonics
- signal/image/video processing
- systems energy engineering
- wearable sensors

MECHANICAL & AEROSPACE ENGINEERING

44 Faculty
1,008 Undergraduates
477 Graduate students

- biomaterials / biomimetics
- cell / membrane mechanics
- control, estimation and optimization
- energy technologies
- environmental technologies
- hard disk drive tribology
- high-energy materials processing
- materials for extreme conditions
- medical device technology
- MEMS for extreme and biological environments
- metamaterials
- robotics / networked systems
- solid and soft matter
- turbulence, geophysical flows, macro/microfluidic flows

NANOENGINEERING

26 Faculty
912 Undergraduates
146 Graduate students

- nanobiotechnology
- nanomedicine
- computational materials science
- advanced nanomaterials
- nanomanufacturing
- nanorobotics
- nanotechnologies for energy storage and conversion
- stretchable electronics
- chemical engineering

STRUCTURAL ENGINEERING

24 Faculty
588 Undergraduates
196 Graduate students

- large-scale experimental research
- earthquake engineering and infrastructure renewal
- multi-hazard mitigation for earthquakes, blasts and more
- computational mechanics for extreme events damage prediction
- aerospace structures / safety
- composites / nanomaterials
- computational fluid-structure interaction analysis
- biomechanics / geomechanics
- geotechnical engineering
- risk analysis / visualization
- structural health monitoring / nondestructive examination
